Work

OneTrust

UX/UI DESIGNER, NOV 2019 – JUN 2020
I worked as a UX/UI designer for OneTrust's web development team where I helped design and maintain the company's marketing sites including designing free tools that acted as alternatives to the OneTrust platform.

UserIQ

UX DESIGNER, FEB 2019 – AUG 2019
As a full-fledged UX Designer, I was able to take on more end-to-end UX projects by myself and lead ideation sessions.

JR. UX DESIGNER, DEC 2017 – FEB 2019
Since UserIQ was an early stage startup with only a two person design team, I assisted our Director of User Experience with all parts of the product design process from conducting user research to creating final mockups and prototypes.

Force Marketing

GRAPHIC DESIGNER, NOV 2017 – FEB 2019
This was a contract position at a car marketing agency where I designed direct mail pieces, Facebook ads, Google retargeting ads, marketing emails, and images for clients' web pages.

TopTix

MARKETING COORDINATOR, DEC 2016 – FEB 2017
My role at TopTix grew to include media buying and full ownership of our industry event presence.

MARKETING ASSISTANT, FEB 2016 – DEC 2016
I helped the North American branch of an international ticketing software company with customer relationship management, ad and sales proposal design, press release writing, lead generation, and trade show marketing.
